

NHS80 – External / Facade Expansion Joint

Description

The Miska NHS80 is a waterproof joint system designed for both internal and external vertical wall and soffit applications.

Features

- ◇ A movement range of $\pm 55\text{mm}$ is catered for with provision for lateral and vertical movement during seismic events.
- ◇ Requires a block out of 80mm wide x 70mm deep to ensure a flush finish with surrounding levels.
- ◇ The use of Santoprene in both seals resists moisture and chemical attack whilst providing an aesthetically pleasing architectural finish.
- ◇ The Santoprene seal can be supplied in a limited colour range to match external facade materials.
